Subject: Ex. 6 - Personal Privacy

Rich,

I just wanted to inform you that I disconnected the Simmons Transportation water trailer from the mobile home at Ex. 6 - Personal Privacy this afternoon.

The reason for this is that the electrical power at that residence got shut off until the end of the week according to Timara.

Because they have no power, they have extension cords running for the other mobile home providing power to their mobile home and they also had an extension cord coming out of their mobile home using it to provide power to the Simmons transportation trailer.

When we were over there the jet pump in the Simmons trailer was not running correctly and when I touched it, the motor case was extremely hot because it is not getting the proper power requirements to allow the motor to run correctly possibly causing damage to the unit.

Currently the trailer is being supplied by the Cabot setup and we will make sure that it is filled daily to provide water to the residence by transferring water from the Simmons trailer to it .
